Date: 03-04-2017

Time: 2.00PM

Venue- Prof. P. C. Roy Memorial Conference Hall, Commerce Block, Ravenshaw University

GST will be a game changing reform for the Indian economy by creating a common Indian market and reducing the cascading effect of tax on the cost of goods and services. It will impact the tax structure, tax incidence, tax computation, tax payment, compliance, credit utilization and reporting, leading to a complete overhaul of the current indirect tax system. GST will have a far-reaching impact on almost all the aspects of the business operations in the country, for instance, pricing of products and services, supply chain optimization, IT, accounting, and tax compliance systems.

The Government is committed to introduce GST by April 2017. Tax payers need to be GST compliant to be able to test system changes in time. Depending on the operating geographies, size and sector, the changes would be substantial and may require proactive planning with a time-bound action plan. In order to prepare for the implementation of GST, companies need to understand GST policy development and its implications for scenario planning and transition roadmap preparation.
